Dear Ms. Gheriani Babir:

RE: Food Zone (53 D-602)

This is in reply to your submissions dated November 25, 2013 and February 3, 2014 to the Canadian Food Inspection Agency (CFIA), which were forwarded to our Bureau on June 2 and 16, 2014, seeking acceptance of the subject product for use as a lubricant with incidental food contact in food processing establishments. The Agency requested the Bureau of Chemical Safety to assess the chemical safety of this product based on its chemical composition and its proposed use.

Based on the information provided, we can advise that we see no reason to its use as proposed in food processing establishments provided that:

- a) It is used on equipment or machine parts where contact of the lubricant with food is only incidental; and
- b) It is used in the minimum amount required to achieve its technical effect.

The label of the product, as presented, is deemed acceptable for its use in food plants.

Yours truly,

Marina Vivas
